

Contributions to Geology

CONTENTS

	Page
The Lower Devonian Water Canyon Formation of Northern Utah <i>J. Stewart Williams and Michael E. Taylor</i>	38
Flexural Folding of Inactive Surfaces <i>Ronald B. Parker</i>	54
Geologic Reconnaissance of the Southern Absaroka Mountains, Northwest Wyoming: Part I — The Wood River-Greybull River Area <i>William H. Wilson</i>	60
Cataclastic Migmatites of the Medicine Bow Mountains, Wyoming <i>M. E. McCallum</i>	78
SHORT NOTES	
A Staining Technique for Differentially Porous Rocks <i>Garrie L. Tufford</i>	90
Relict Wisconsin Ice in Yellowstone National Park, Wyoming <i>John M. Good</i>	92
Significant New Fossil Plant Locality in Utah <i>Charles Bass</i>	94

SUBSCRIPTION RATE \$3.00 per year. Special student rate \$1.50 per year in the U. S. when application accompanied by certification of student standing by a faculty member of the appropriate department.

CONTRIBUTORS should submit manuscripts typed, double-spaced on 8½ x 11 paper. All manuscripts should conform to the usage of the Geological Society of America Bulletin. Full page illustrations should be called Plates. Smaller line drawings or single photographs should be called Figures. Groups of photographs are called Plates with single photographs within the group referred to as Figures within that Plate. Stratigraphic usage should follow the recommendations of the Commission on Stratigraphic Nomenclature. Authors requiring illustrations larger than a full page should consult the editor.

ADDRESS SUBSCRIPTIONS OR MANUSCRIPTS to Ronald B. Parer, Editor, Contributions to Geology, P. O. Box 3006, Univ. Sta., Laramie, Wyoming 82071. Published in cooperation with the Geological Survey of Wyoming. Heinrich Toots, Editorial Assistant.
