

# *Rocky Mountain Geology*

## Information for Contributors

### INTRODUCTION

*Rocky Mountain Geology* is published twice yearly by the Department of Geology and Geophysics, The University of Wyoming. The focus of the journal is regional geology and paleontology of the Rocky Mountains and adjacent areas of western North America. Except by invitation, manuscripts must contain results of previously unpublished, original research; occasional special articles or theme issues may be solicited by the editors.

### SUBMITTING MANUSCRIPTS

All relevant files for your manuscript, including text, figures, and tables, should be sent electronically via e-mail or some other means over the Internet. Paper submissions are no longer accepted, unless the author does not have access to an Internet connection. If you cannot submit your article via any electronic means, please

mail two copies of your paper manuscript along with your electronic files saved to a CD. Double-space all text, including figure captions, references cited, appendices, and other miscellaneous items. Use one-inch margins all around, a 12-point type-size, and leave the right margin unjustified. Use a maximum of three hierarchical levels of headings (level 1, **BOLD CAPS**; level 2, **Bold Caps and Lower Case**; and level 3, *Caps and Lower Case Bold-face Italic*), all flush-left. Do not use a separate title page, and avoid use of footnotes. Include a suggested running-head (for use on the top of alternate pages). An abstract encapsulating the findings, conclusions, and implications of the research must accompany all manuscripts. Also include a listing of key words, usually with a maximum of fifteen. Retain original copies of all figures and tables until the manuscript is formally accepted. Review copies of figures must be of quality adequate for

all potential aspects of evaluation.

Submit manuscripts via e-mail to: [rmg@uwyo.edu](mailto:rmg@uwyo.edu) or via mail to: *Rocky Mountain Geology*, Department of Geology and Geophysics, Dept. 3006, The University of Wyoming, Laramie WY 82071, U.S.A. If the article is coauthored, specify a corresponding author. Please provide the names, titles, and complete mailing addresses of several individuals qualified to review the manuscript. Such persons, in addition to those selected by the editors, may be asked to evaluate the paper. Please also include the email addresses of the author(s) and proposed reviewers.

### MANUSCRIPT ACCEPTANCE

Judgments of the paper's acceptability and suggestions for enhancement are sent to the author, at which time he or she may be requested to rework parts in light of referee comments. The paper is then resubmit-

DIGITAL SUBSCRIPTION RATE \$30.00 per volume (two issues). Single issues \$17.50 each. Available at [geobookstore.uwyo.edu/rmg](http://geobookstore.uwyo.edu/rmg). Individual articles available for download at [rmg.geoscienceworld.org](http://rmg.geoscienceworld.org).

DIGITAL SUBSCRIPTIONS and related matters may be addressed to [rmg@uwyo.edu](mailto:rmg@uwyo.edu) or *Rocky Mountain Geology* Subscriptions, The University of Wyoming, Dept. 3006, Laramie WY 82071, U.S.A.

(continued from previous page)

ted, and may be reevaluated prior to acceptance. Authors should retain one pristine copy of the manuscript and all illustrations in case of loss or damage during transport.

Upon acceptance of the manuscript for publication, authors must submit the entirety of the text, including figure captions, references cited, and appendices via e-mail or some other means over the Internet. Mailing a CD is also acceptable. Camera-ready originals of tables and illustrations (and their files in digital form if computer-composed) must accompany the final text. The *Rocky Mountain Geology* production team uses a Apple OS X/Adobe-based computer system for page composition. We ask, therefore, that all electronic files (text, figures, tables) be submitted by the authors in formats that are compatible with OS X and Adobe software.

#### **STYLE FOR TEXT AND REFERENCES**

Style in the basic text and captions should follow conventions used in current issues of this journal; in sections dealing with systematic paleontology, use the heading arrangements characteristic of current issues. Bibliographic citations and tables should conform to specifications in: Guidelines for authors of papers submitted to the *Geological Society of America Bulletin*, v. 108, p. 1068–1072 and 1197–1198. The metric system of weights and measures must be used. Where appropriate, however, metric designations may follow measures in the English system (e.g., “. . . a 1,763 ft- (537 m-) thick section . . .”). Abbreviations must be defined at (or in advance of) their first use. Manuscripts not following the requested style may be returned to the author without review.

#### **FIGURES, TABLES, AND OVERSIZED PAGES**

Provide numbers for figures and tables, and refer to each of them in the

text. List figure captions on a separate page following the references. Tables, each with a suggested title, should be reproduced separately and placed after the figure captions; please keep tables to a minimum. Do not insert figures or tables within text of the manuscript; rather, indicate on the manuscript (between paragraphs) approximately where figures and tables should be inserted upon publication. All illustrations must be referred to as “figures.” Oversized items will be placed as electronic attachments at the end of the paper, with thumbnail versions at appropriate positions within the text. In illustrations, special attention should be given to designation of orientations of views, scale used, and clarity of identification of discrete subjects within a figure. Include one or more linear scales using metric units on the figure itself; do not include magnifications in figure captions. Specify any vertical exaggerations.

Typewriter- or handwritten lettering on figures is unacceptable. Except for thumbnails, submitted figures should be no more than twice the size of intended reduction, and dimensions of a finished page cannot exceed 6.75 x 9 inches. Plan illustrations for publication at full-, half-, or third-page widths. Rasterized graphics submitted digitally must have a resolution of at least 300 dpi, and the fonts used must be Adobe-compatible (submitted Microsoft fonts will be substituted). Photographs, if not transmitted digitally, must be printed clearly on glossy paper. Fossils or other specimens should be illuminated from the viewer's upper left. Wherever possible, authors are requested to make backgrounds of figures white. Notations identifying author and figure number must be made outside the image area.

#### **COVER ILLUSTRATION**

Cover illustrations ordinarily pertain to an article in the issue and represent something of general scientific, regional, or historical interest. The editors invite submission of such illustra-

tions for possible use, accompanied by brief, informative captions. Collages are possible, and cover illustrations typically will be reproduced in color. All graphics for potential cover illustrations must be submitted as high-resolution images.

#### **PROOFS**

Digital proofs of the article will be sent to the corresponding author in PDF format via e-mail. The author should check the proofs carefully for errors and omissions in text, figures, legends, tables, appendices, and bibliographic references. The author should either mark corrections directly on printouts of the proofs (proofreaders' marks can be found in most American dictionaries) or within the PDF file using Acrobat Professional, Acrobat Reader, or OS X Preview, and promptly return the corrections and edited manuscript to the Managing Editor. Production charges accruing from excessive changes in proofs must be assumed by the authors. Most aspects of photocomposition will be completed in Laramie by staff of *Rocky Mountain Geology*, using software standard for desktop publishing. Proofs, therefore, ordinarily will be in the form of page proofs. Whenever appropriate, routine communications dealing with manuscripts will be transmitted via e-mail. Original illustrations will be returned to the corresponding author following publication of the article.

#### **PAGE CONTRIBUTIONS AND REPRINTS**

Although authors are asked to contribute \$20.00 per page toward costs of digital production, payment is voluntary and is unrelated to manuscript acceptance. Complimentary offprints will be delivered via e-mail to the corresponding author in the form of two PDFs, optimized for print and electronic use. Consult directly with Managing for current policies related to open access publication.
